

SWALA OIL AND GAS (TANZANIA) LIMITED

Company Number 84838

Press Release

14th October 2013

POSITIVE RESULTS FROM KIDATU SEISMIC PROGRAMME

Swala Oil & Gas (Tanzania) Limited (“Swala”) is pleased to provide an update on the 2D seismic programme underway on the Kilosa-Kilombero licence (“License”) in Tanzania. Swala has a 50% interest in the license and is the operator.

The programme over the Kidatu basin area in the License has been completed and the preliminary interpretation of the results is positive. These results follow those observed from the programme in the Kilosa basin to the north that were also positive as announced by Swala on 18 September. The seismic survey has now commenced over the Kilombero basin, south of the Kidatu basin.

A total of 143km of 2D seismic were acquired over the Kidatu basin. The initial results based on preliminary processed data indicate the presence of large-scale structures along the edges of the basin together with a major intra-basin high identified on dip and strike lines. The structure may be as large as 30 to 60 square kilometres.

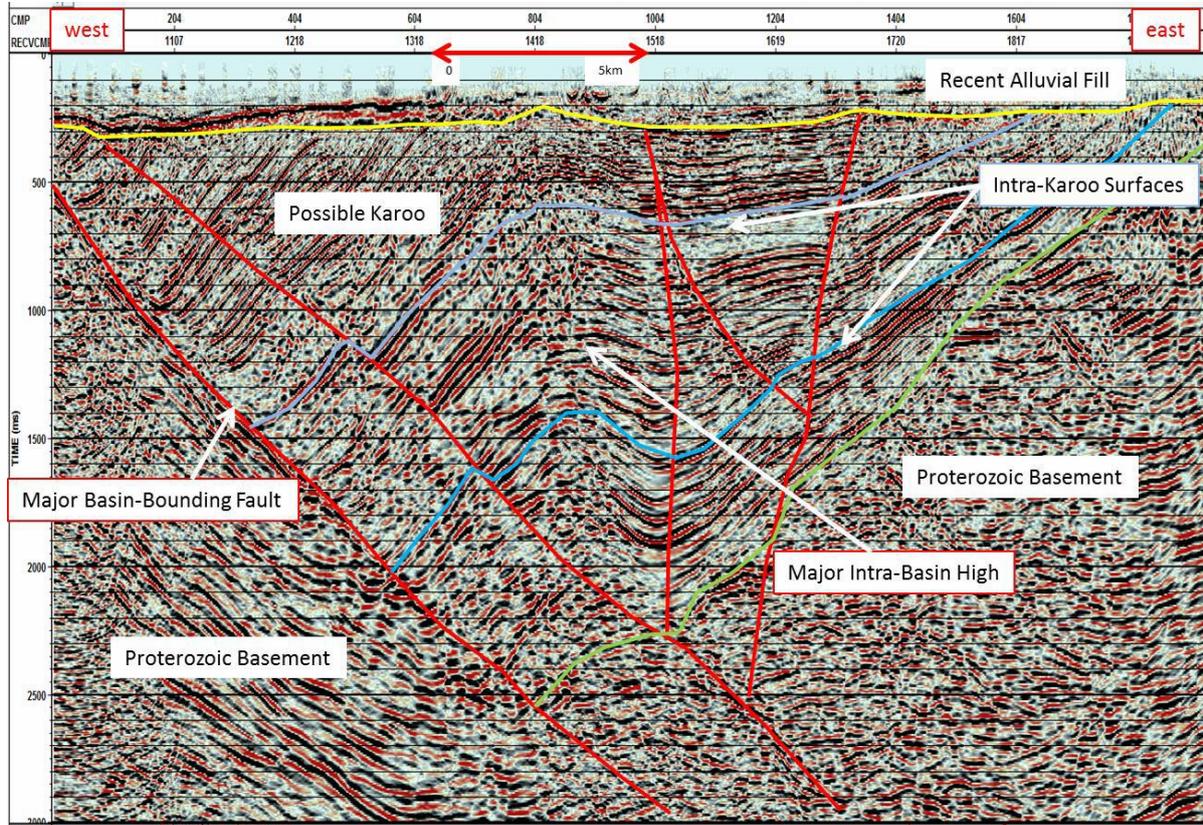

The seismic team has now relocated to Kilombero where the programme is expected to take a further three weeks to complete. Upon conclusion of the Kilombero survey the seismic crew will mobilise to the Pangani Licence in the north of Tanzania to acquire up to 200km of 2D seismic in the two potential basins that were identified in 2012.

Dr. David Mestres Ridge (CEO) said, “The results from the Kidatu survey have already shown the potential presence of very large structural traps, an encouraging result and one that underscores our team’s geological understanding of the area. Whilst additional processing and interpretation of the recorded data is still needed, the positive results to date give us growing confidence in our continued exploration activities within the Kilosa-Kilombero Licence.”

About Swala:

Swala is an affiliated company to Swala Energy Limited, a company in turn listed on the Australian Stock Exchange (ASX) with ticker “SWE”. Swala holds assets in the world-class East African Rift System with a total net land package in excess of 17,500km². New discoveries have been announced by industry participants in a number of licences along this trend, including Ngamia and Twigga, which extend the multi-billion barrel Albert Graben play so successfully developed by Tullow Oil into the eastern arm of the rift. Swala has an active operational and business development programme to continue to grow its presence in the hydrocarbon provinces of East Africa.
