UPDATE ON PARTIAL INTERRUPTION OF SONGO SONGO PRODUCTION

Swala Oil & Gas (Tanzania) Plc ("Swala" or "the Company") has been advised that Panafrican Energy Tanzania Limited ("PAET") temporarily partially interrupted production from the Songo Songo gas field as a response to the emergency shutdown of the Songas Facilities ("Songas"). Swala has a 7.93% interest in PAET's holding company, PAE Panafrican Energy Corporation.

The shutdown was triggered as a result of the failure of a line stopper that had been installed to bypass a damaged valve on a pipeline owned and operated by Songas. The incident caused no injuries to personnel and no damage to the environment or the wider community. Songas actively addressed the issue in close cooperation with PAET, enabling the delivery of gas supplies to Songas to recommence promptly.

PAET took all appropriate steps to minimise disruption to its customer base during the incident, diverting gas volumes through the NNGIP to the extent possible. There was no disruption to the supply of Songo Songo gas to PAET's industrial customer base and the impact of this event on 4Q forecasts is expected to be minimal.

About Swala:

Swala is the first Oil and Gas company listed on an East African Stock Exchange with a significant local ownership. Swala holds assets in the world-class East African Rift System with a total net land package in excess of 14,000 km² as well as a 7.93% interest in PAE PanAfrican Energy Corporation. New discoveries have been announced by industry participants in a number of licences along this trend that extend the multi-billion-barrel Albert Graben play so successfully developed by Tullow Oil into the eastern arm of the rift. Swala has an active operational and business development programme to continue to grow its presence in the hydrocarbon provinces of East Africa and globally.
